

Lambda Use Case

- ◆ A function you're never going to reuse

Typical Use of Lambdas

For each item in the data:
Apply the lambda function first
Then do the sort or min or max

- ◆ With **sorted()**, **min()**, **max()**

```
sorted(data, key=lambda x: expr)
```

```
min(data, key=lambda x: expr)
```

```
max(data, key=lambda x: expr)
```

An implicit map(lambda, data)
