Make Sure You Have

- Python 3

  - At least 3.6

- If you don't, now's the time

  - Python 2 expires in 2020

- http://slott-softwarearchitect.blogspot.com

- https://github.com/slott56/five-kinds-of-python-functions

Some Background

- Basic Math:

$$y = f(x)$$

- *f* is a function

- Example Code using **abs()**

```
>>> abs(-5)
5
```
